

Rima Adomaviciene

Jewelry Designer

Even though I've earned a degree in Humanities, I have been intrigued by art since I was a kid. As far as I remember, I was always surrounded by the artists. Painting was my very first passion! Even when I was a little girl I was always trying to make anything from scratch. When you grow up in Lithuania, being an artist is a lifestyle. I started making jewelry when I moved to the USA 13 years ago. Jewelry is a big part of my life. I feel inspired by nature. Most of my jewelry designs are made of natural stones, wood, leather and metal. Sometimes I draw inspiration from unique color combinations and shapes. I have been invited to the events to teach others how to make jewelry; I present my jewelry collections quite often at the fashion shows and exhibitions. My latest collections were shown in Pennsylvania, Illinois, Ohio and Michigan. Some of my jewelry designs were at the art galleries in Chicago and Cleveland. It's really an honor to be invited to the fashion shows, to present my jewelry collections and to meet my clients face to face. I truly value one-on-one relationships with my clients so I can create jewelry just the way they imagine it. In 2018 I was nominated and won an Oscar for the Red Carpet Chicago Media Follow the Oscars "The Best Accessories Designer of the Year".
